## Introduction

The following report provides a summary of the angling year in Cornwall and collates the fish recorded and forwarded to the CFSA by member clubs for awards. It therefore provides a useful record of the state of sea angling in Cornwall over the year.

Boat and shore angling activity was disrupted again by the COVID 19 pandemic in early 2021. This resulted in restrictions to travel and recreational activity from 5 January until the end of March and resulted in the loss of some potentially good fishing, particularly for winter species.

As also observed in 2020, we are still seeing profound changes in the timing and distribution of fish species and the availability of specimen fish of importance to recreational sea angling. Whilst climate change is undoubtedly responsible for some of these changes, it is also apparent that high levels of commercial fishing effort are being directed at the waters around Cornwall, particularly by EU vessels fishing on offshore grounds (to within 6 miles of the shore). It is hard to see how the ongoing pressure from large beam and stern trawlers can be considered to be sustainable either for recreational sea angling or our local inshore commercial fleet. The sheer scale of these fisheries is undoubtedly having the effect of turning the inshore waters of Cornwall into an underwater desert. The decline in flatfish species has been particularly apparent within this year's catch returns with very few turbot, plaice or dabs being caught by anglers in areas where they were once common. It is also highly evident that the size of flatfish species has markedly diminished with it now being rare to see a plaice over one and a half pounds. The lack of quality specimen fish within the 2021 boat returns is also particularly evident with many wrecks reported to be devoid of larger species of interest to recreational angling such as Pollack and ling.

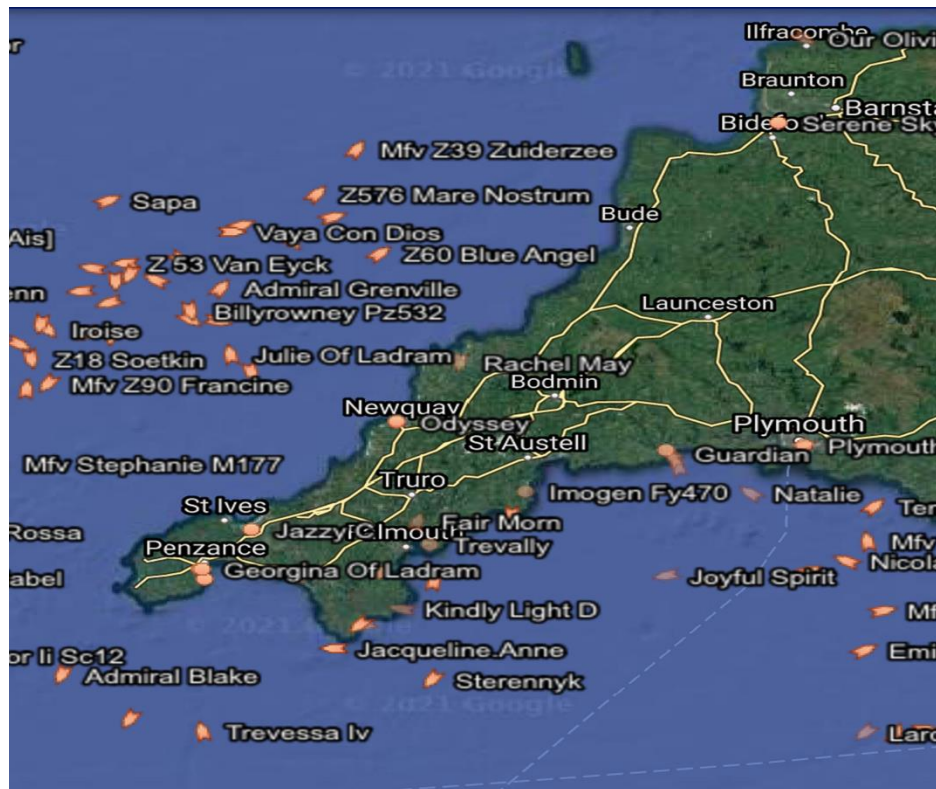

The following map is a screenshot from Marine Traffic in early April 2021, a time when many flatfish species congregate off the Cornish coast to spawn. All of the vessels in the screenshot are engaged in commercial fishing activity. Note in particular the grouping of trawlers off the North Cornish coast coinciding with the opening of the Trevoise Cod "protection box" as well as the numbers of mostly Belgium and French registered vessels working off the Lizard and back up the English Channel.

A further close up screenshot of the Trevese cod box area on 1 April when the box opened up is provided below. This area is well known for spawning aggregations of Dover Sole and other flatfish at this time.

The following map shows the North Cornish coast 4 days later on the 5<sup>th</sup> April with numerous French and Belgian Trawlers working off the North Cornish Coast. There must surely be a question as to how sustainable this pressure is for the long term future and protection of our fish stocks.

In addition to increasing commercial fishing pressure, we are also directly witnessing the effects of climate change within Cornish Inshore waters and this also appears to be affecting the distribution and availability of some fish species around our coast. This is not all entirely bad news as this phenomenon has also provided Cornish Anglers with some opportunities to catch novel fish species moving up from the Bay of Biscay such as Gilthead Bream which appear to be getting larger and more widespread year on year. We also recorded a new Cornish and British record for a Two Banded Bream caught by Mike Toogood on the North Cornish Coast. This is the first record of this species in the UK.

One species that has certainly exploded in recent years is the Spider crab, whose populations have made rock fishing in some locations virtually impossible until the majority shed their shells and return to deeper water in late July. Blue fin Tuna populations have also increased in abundance annually and are now a very common sight. Their presence also appears to be influencing and impacting on other fish species, particularly, bait fish populations which in turn may be affecting the species that we like to catch. 2021 was very unusual for the absence of mackerel which did not show up in any numbers throughout the summer months. Sandeel populations have also declined substantially which may also be having an influence on the food availability for some species. It may be argued that this has been offset by the growing populations of Pilchards and Anchovies which are also increasingly being seen and caught.

Despite the changes and challenges, Cornwall still remains unique in having a relatively large diversity of fish species to target and 37 different qualifying fish species were recorded from the shore in 2021 by CFSA member clubs. Cornwall therefore still has the potential to produce some good sea angling with specimen fish recorded from a range of species including new County Ladies and Junior shore and boat records being broken in 2021.

In 2019, the CFSA member clubs agreed to reduce the qualifying specimen weight for senior men back to 50% from the previous 75% qualifying weight. Specimen qualifying weights for Ladies and Junior anglers were maintained at the one day minimum specimen weight providing these categories with a greater opportunity to record fish.

The move to a 50% qualifying weight for senior men has, on the whole, increased the number of fish being recorded in 2021 as well as the number of participating club anglers although few still manage to achieve 10 specimens.

The number of junior anglers recording fish remains of concern and we should all be encouraging junior anglers to participate where we can. From the shore, only 2 fish were recorded by juniors in the 11 to 16 age group and just 10 fish in the U11 age group. Only 3 fish in total were recorded within the junior boat section, with 2 fish in the U16 category and 1 in the U11 category.

# 1.0 Weather conditions in 2021

## 20.0 Junior Boat Awards and Competition Winners.

**Junior Boat Champion 11-16 Years:** Sam Taylor St Mawes SAC 3 Species 133.92%

**Junior Champion 11-16 Years (R/U)** Talan Brewer Mevagissey SAC 2 Species 113.45%

**Junior Boat Champion (U 11) Year:** No fish recorded

**Junior Boat Champion (U 11 Year) (R/U):** No fish recorded

**The North Coast Shield:** Talan Brewer Mevagissey SAC 60.91 %

**(Best boat caught specimen 11-16 Years)** Pollack 8.8.7

**South Coast Shield:** No fish recorded

**(Best boat caught specimen 11 and under)**

**The Kernow Cup:** No fish recorded

**Best boat caught specimen by junior female)**

**The Bass Trophy:** Talan Brewer Mevagissey SAC 52.54%

**(Best boat caught Bass by a Junior)** Bass 4.15.14

**The Mackerel Trophy:** Sam Taylor St Mawes SAC 90.31 %

**(Best boat caught mackerel by a junior)** Mackerel 1.1.0

**Heathcoats Perpetual Pollack Cup:** Talan Brewer Mevagissey SAC 60.91%

**(Best boat caught Pollack by a junior)** Pollack 11.1.0

**The Dogfish Trophy:** No fish recorded

**(Best boat caught dogfish by a junior)**

**Falmouth Shark Club Junior Boat Trophy:** Talan Brewer Mevagissey SAC 52.54%

**(Discretionary Awarded by C.F.S.A Recorder)** Bass 4.15.14

**Discretionary Boat Trophy:** Sam Taylor St Mawes SAC 60.71%

**(Discretionary Awarded by C.F.S.A Recorder)** Mackerel 1.1.0

**C.F.S.A Skippers Trophy** Matt Robins "Atlantis" 1 species 53.60%

**(Best 10 Species caught on Charter Boat by CFSA members in 2021)**

## 21.0 C.F.S.A Boat Fish of the Month Awards 2021.
