Summary of 2015 shore caught fish returns

- In total, the CFSA member clubs recorded 386 fish from the shore in 2015 over the required qualifying weights. 292 qualifying fish were recorded from the senior men (over 75% of the CFSA specimen weight), 33 from the Ladies, 37 from the junior under 16s and 23 from the junior under 11s. The 386 shore caught specimen fish represented 37 different species caught by 150 different anglers. Lesser Spotted Dogfish (59) and Ballan Wrasse (32) and Horse Mackerel (Scad) (36) were the most commonly recorded species.
- Fish returns and fishing success in 2015 were notable for a number of reasons. The weather was extremely mild throughout the 2014/15 winter period, the spring and early summer were cold and the unusually mild Autumn extended into December with an extended period of exceptionally poor weather. As in recent years, the wind throughout the summer months was predominantly from the North and North West. This resulted in very few periods of settled conditions which particularly affected the North Coast. The strange weather patterns observed throughout 2015 certainly seemed to affect the number and availability of fish species. It was particularly notable that mackerel did not arrive in any numbers until July and this was particularly notable in the spring months in the Lizard area. Sandeel abundance within inshore waters was also reported to be unusually low.
- Despite the unusual weather patterns, some very good specimen fish were weighed into the CFSA in 2015 as evident in the list of the best of each fish species recorded (page 13). The 75% qualifying weight used by the CFSA for specimen fish certainly helps to reduce the numbers of fish retained for weighing. In addition, there are a growing number of anglers who feel that we should consider additional fish conservation measures to further reduce the impact of angling on slow growing species. There are already good examples of recording fish for clubs and competitions from around the South West which perhaps the CFSA needs to consider further to ensure that it encourages the participation of as many anglers as possible. This is increasingly important as new legislation is introduced to protect certain fish species restricting anglers ability to retain fish. Clearly however, there is still a need to ensure that fish are weighed and recorded accurately and fairly.
- 73 shore caught fish were recorded over the 100% specimen weight. Species that recorded reasonable numbers of 100% specimens were Spotted ray (9), Triggerfish (5), Cuckoo Wrasse (4), Small eyed ray (6) and Cod (5). Species notably lacking in specimen fish over 100% were Flounder (1), Bass (1), Thick Lipped Mullet (1) and Whiting (1). Many anglers again commented on the overall lack of bass in the 3 to 6lb range in 2015 throughout the main summer months. Only 1 bass over 8lb was recorded from the shore in 2015.
- 2 senior shore records were broken; Blonde Ray, 26-15-12 by Mark Reed and Triggerfish by Sue Rule of 4-12-6.
- 3 junior records were recorded in 2015. Josh Attreed recorded a John Dory of **1.2.3** in the under 16 category. Talan James broke the records for Pollack (**4.1.5**) and Cod (**5.10.1**) in the Under 11 juniors.
- Sue Rule claimed several new ladies records including Cod (**5.4.6**) Triggerfish (**4.12.6**) and Scad of (**1.1.3**). Natalie King (St Columb SAC) has taken the ladies bass (**7.1.4**) and Gilthead (**4.5.4**).

Summary of number of species recorded from the shore in 2015.
